We have this error because the sql is not exist
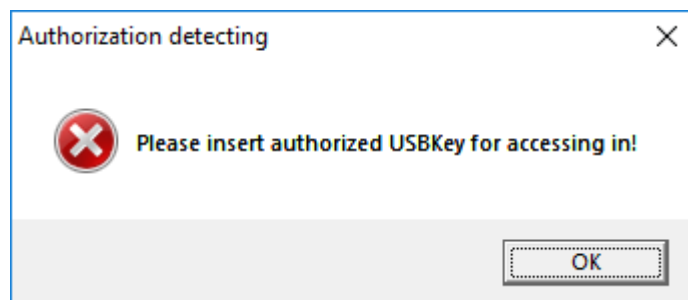

(or the connexion on the sql server is bad)

Click on « OK » to continue

click on « finish »
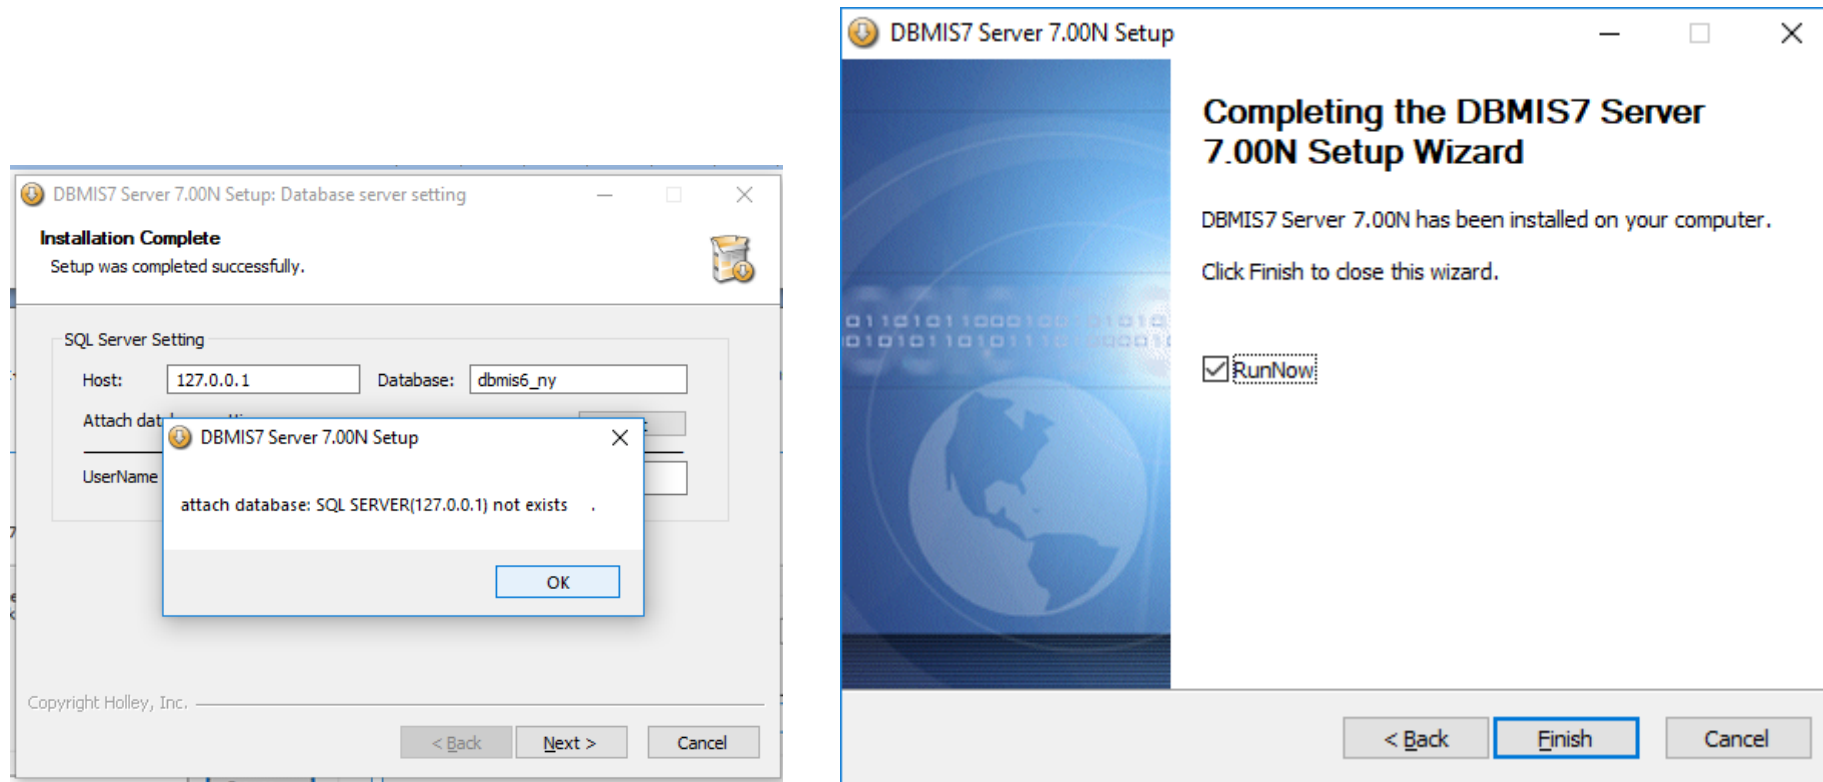

We have this ERROR, if theET199 dongle is not connected or it's bad

**If the ET199 dongle 's GOOD, the server's software is open (we have the shortcut to task bar)**

YNServer (After Launch)

SOFTWARE PRESENTATION AFTER INSTALLATIONS :
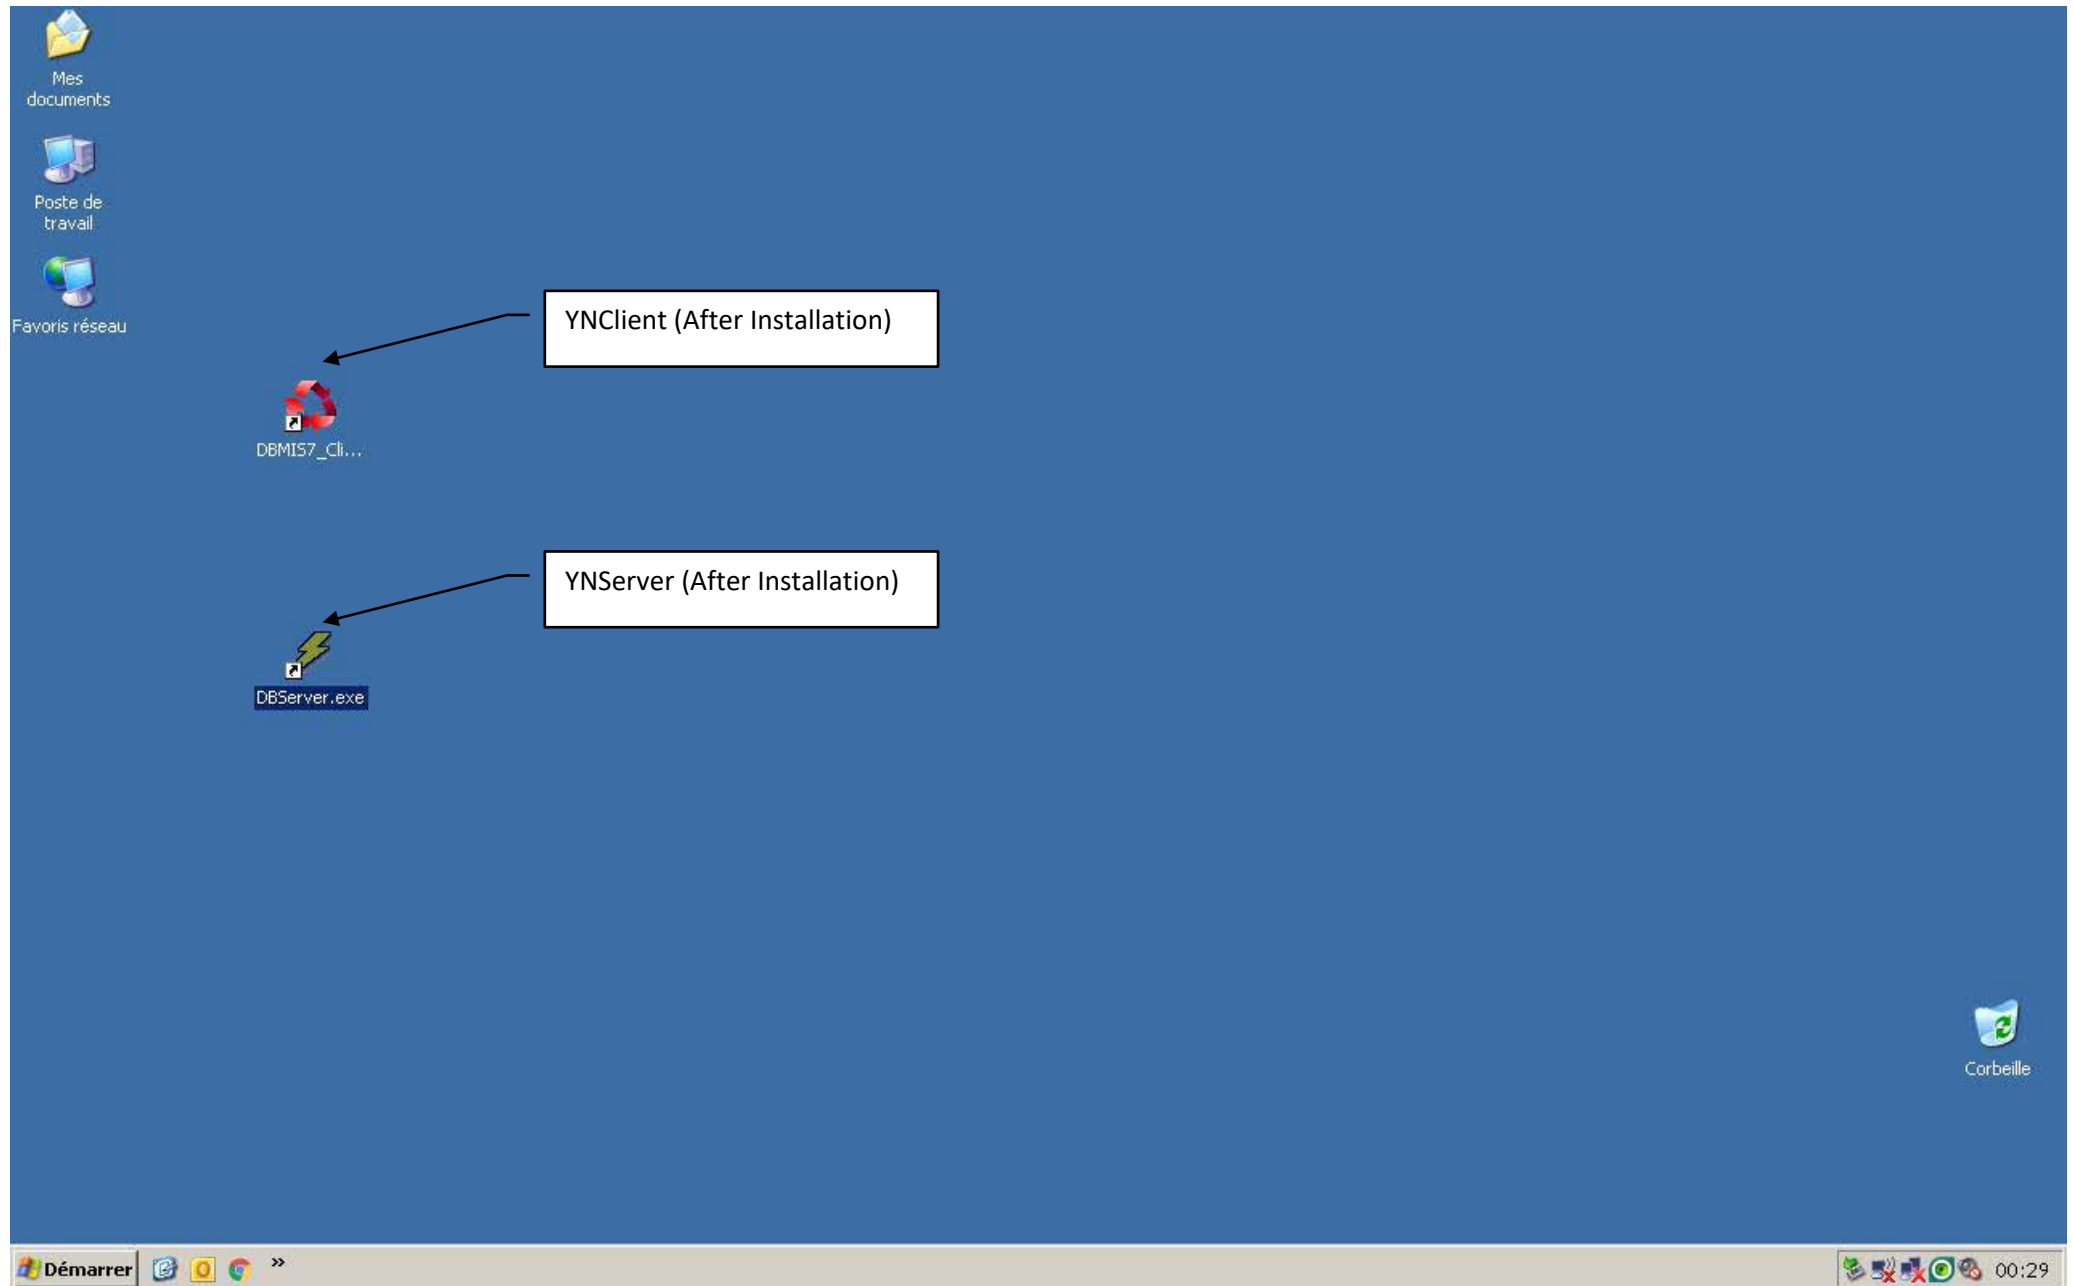

Before launch the client's software, it must to reset (initialise) the dongle ;

In the server is pc :

1- Move or deconnect the ET199 's dongle.
2- **CONNECT OTHER ET199'S DONGLE OR INSERT THE SAME DONGLE**
3- Open the server's software (double click) on the shortcut on task bar
4- And click on the button « USB DiskID Reset »
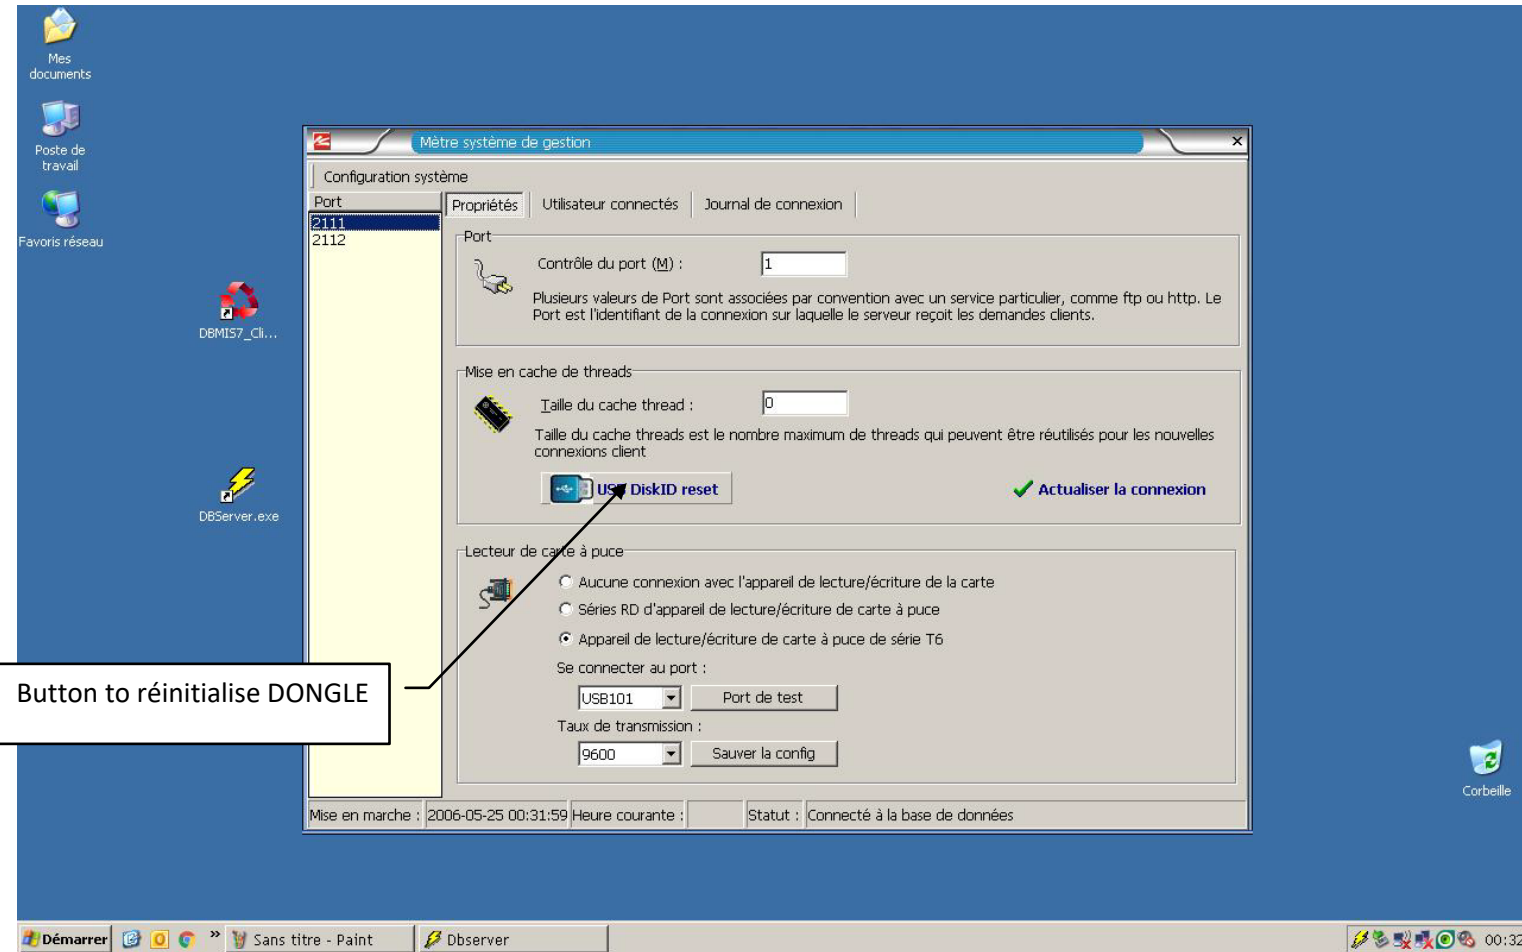

If the dongle is not connected or it's bad, we have this error

Else, if the ET199's GOOD, we have this message (the dongle is reset and ready to use on the new client's pc)

(to launch client's sofware on the same pc with server's software, we move (deconnect) and connect the dongle and after, launch client's software

LAUNCH DBMIS7_CLIENT :

If dongle is not good or not connected, he display this error message :
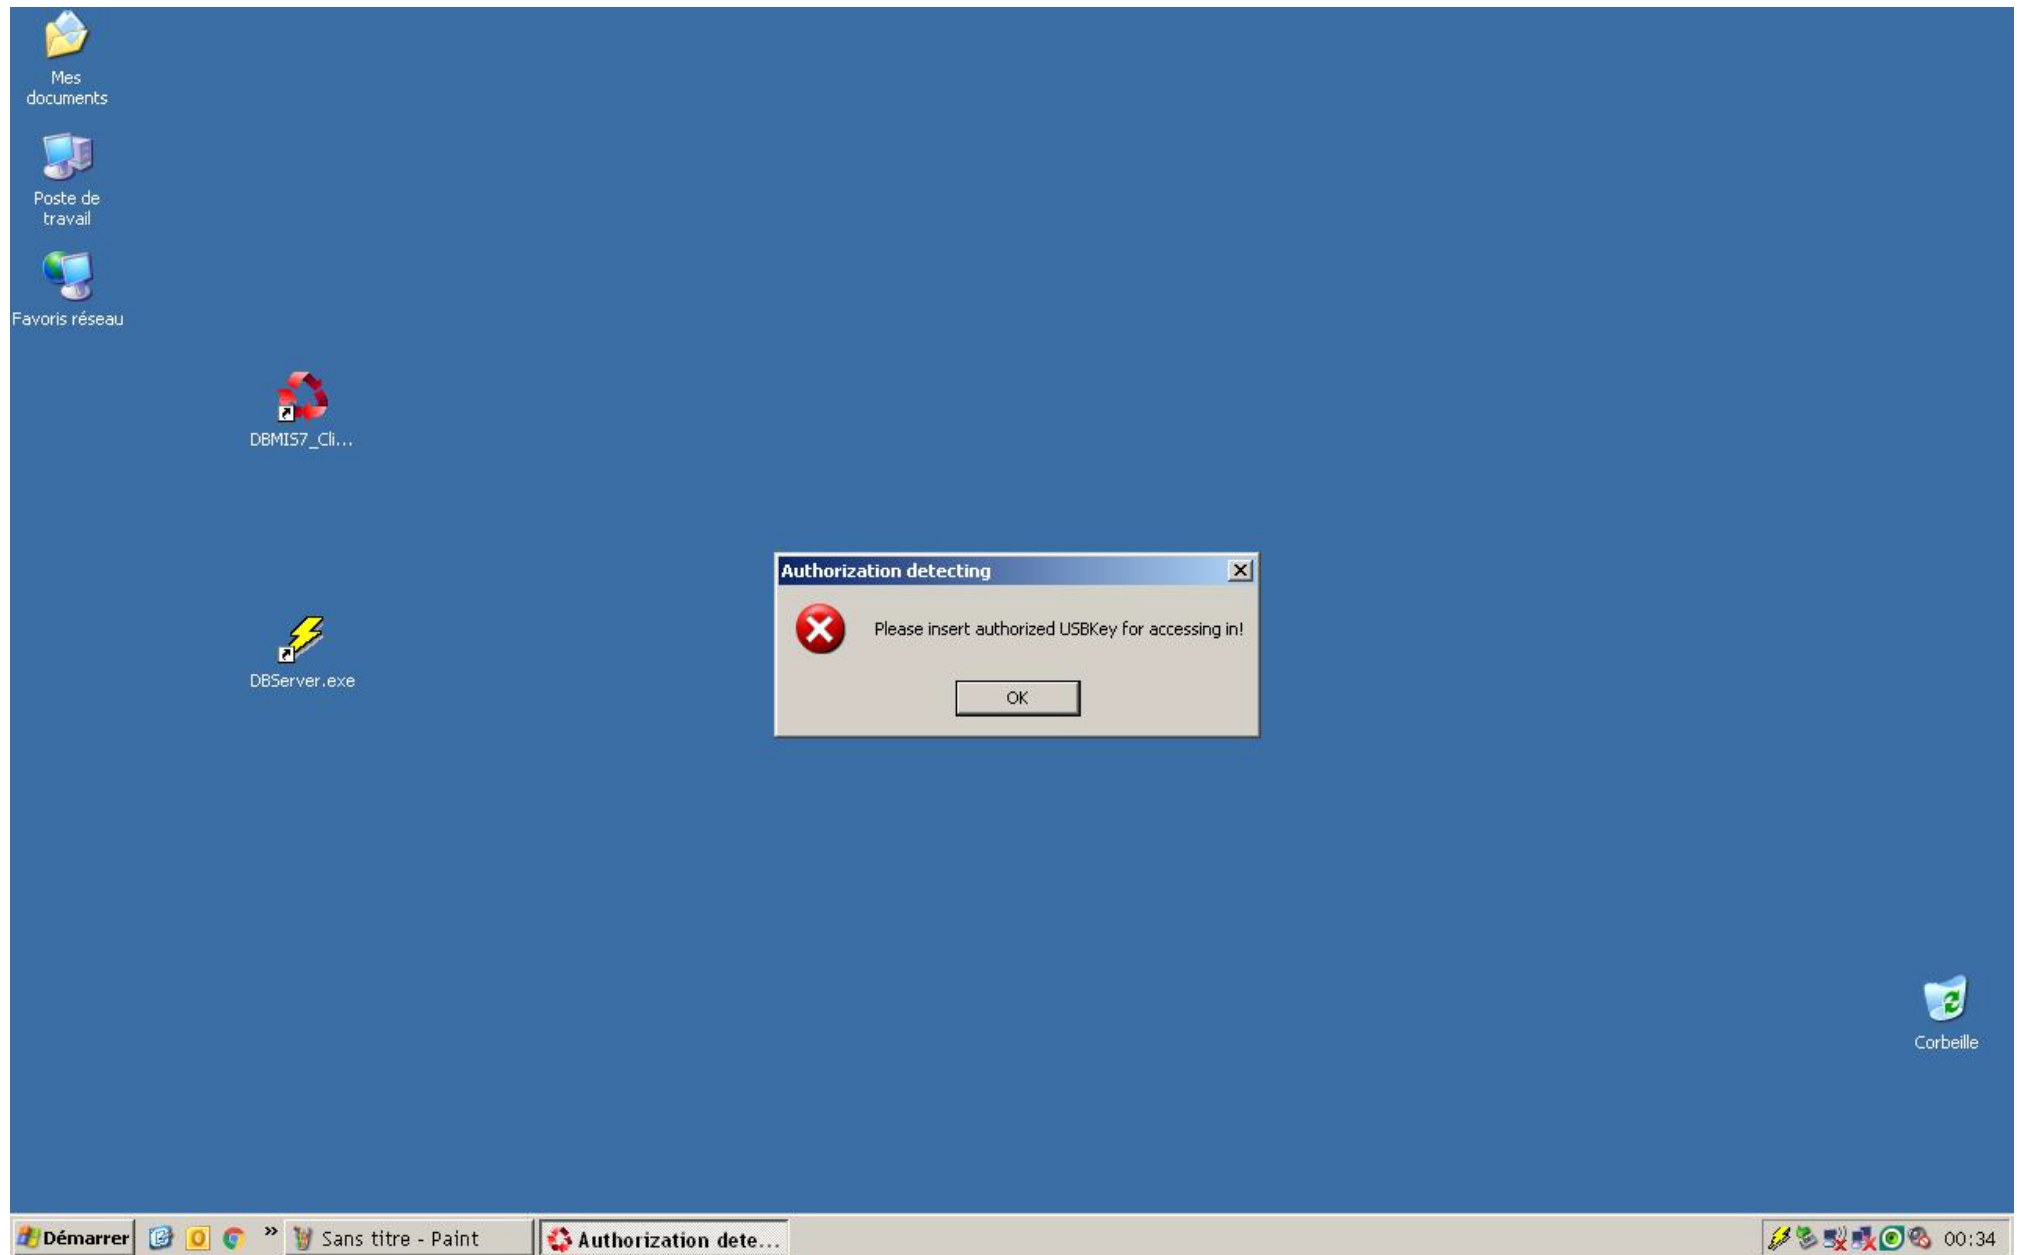

Else the client's software is open (if the database is exist, else the message request sql error is display)
